Adamson Associates Architects

General Contractor

Tishman Construction in New York, NY

Airolite Sales Rep

Architectural Products Inc, Burlington, CT

General Description of Project

The Bank of America Tower at One Bryant Park
Headquarters for the New York operations of Bank of
America Restored and the reconstructed Henry
Miller's Theater

Major Application Benefits

Allowed the use of panelized construction

Project Configuration Amendments Required

Special frames were used to fit Permasteelisa's
glazing frames

Finish

PPG Duranar White Pearl

Production Notes

600 psf load at the Con Ed vault

Logistics, Staging, Transportation Challenges

The louvers were shipped to Canada to be assembled into
the glazing frames. Assembled units were then shipped to
New York for installation in the building.
